Hall Councilor Election Review Committee

The HC Election Review Committee will **review the current hall councilor election process to provide recommendations to SPEC, the HoH and Trustees about ways to improve the process, with a focus on increased resident involvement, greater transparency, and accurate representation.**

Items of committee review will include possible revisions to the election process, a potential screening process for elected hall councilors, and establishing hall councilor campaign guidelines. The committee can also review and make recommendations on additional concerns that arise during the revision process.

We are currently seeking committee members, including two trustees, two residents, and two former/current hall councilors to form the committee, which will also consist of the incoming Chair of the Halls.

If you are interested in joining or have suggestions/feedback, please reach out to spec@mit.edu.
