The audience was fairly sparse today.

**Status update**

We're in Phase II, which is a mirror of Phase I. In Phase I we added new air handling units, replaced insulation, added new fire alarm hardware, and added a new cooling tower which is working quite well.

The new equipment has to be "shaken out" and "balanced", so we're running it this week. This is part of why the MP room is cold.

Phase II: mostly finished with floor and riser work, a little work needs to happen on the roof line. The next phase is to shake out the new fire alarm system. The alarm system has new software and devices, and should be much better than the old system, but still needs to be tested.

Q: Can the 1st floor be opened up for bike room access earlier than the rest of the south side?  
A: Some tweaks are possible to the paper schedule. We'll have a look at this. We were already considering this option.

Q: When are the common spaces open?  
A: Aug 15 (as part of the move).

**Moving**

August 15 is when we become full owners of the building. We'll have full access to the south side then, and this is the earliest move date.

For people moving, we will have Olympia here on Aug 18 (Thu) and 20 (Sat). These dates were picked with a student committee. Aug 15 is when everyone leaving has to move out, so we didn't want to conflict with them.

If you are moving, JHW will be in touch to see if you need moving help. You'll get a schedule as to when the movers will show up.

Trouble spots in January were people weren't ready or had large furniture needing disassembly. You need to be ready (and furniture disassembled) when the movers show up!

You can move yourself if you wish.
General questions

Q: Will there be construction activity after Aug 15?
A: The full building does need to be balanced, once the building is fully accessible. You'll see people around but this shouldn't generate excessive noise.
A: Hallway painting will happen after Aug 15 (late Aug / early Sep). The doors will already be painted.

Q: Can a low-VOC paint be used? The smell is a problem. Some are allergic to paint.
A: We'll look at that.

Q: Can we get a 3-day key buffer like last time?
A: That should be fine.

Round 2 allocations went out Friday. Early next week SPEC will know how 'full' we are.

Q: What happened last time with elevators?
A: We solved what happened last time. We've also moved the elevator timeout from 2 minutes to 5 minutes. We'll have all 5 elevators during that period as well.

Q: Will the ratio of students still be 60/40?
A: We tried to keep that ratio at this level.

Q: Will the rooms be cleaned before we move?
A: They will be cleaned. Brian and house staff will check all stove knobs.

Q: Is fire alarm testing done?
A: Not done. At the end of the project, the entire system has to be tested (both sides simultaneously). Scheduled to start June 20 and should not go past July 8.

Q: We've tried to educate people about fire alarms. Do the basic rules still work?
A: The mechanics are the same.
